Application/Control Number: 10/615,481

Art Unit: 1626

#### **DETAILED ACTION**

#### I. ACTION SUMMARY

Claims 8, 12-14 are currently pending. Claims 1-7, 10 and 11 have been cancelled. Claim 9 is withdrawn from further consideration by the Examiner because Claim 9 is drawn to a non-elected invention. 37 C.F.R. § 1.142(b).

## II. PRIORITY

This is a CIP of U.S. Non-Provisional Application 10/031,429 filed January 15, 2002, now U.S. Patent 6,727,269 which is a 371 of PCT/FR02/00093 filed January 11, 2002.

Acknowledgment is made of applicant's claim for foreign priority to French applications Serial Nos.: 01/00396, filed on January 12, 2001, 99/09496, filed on July 22, 1999, PCT/FR00/02095 filed July 21, 2000 under 35 U.S.C. 119(a)-(d). However, Applicant has not filed a certified copy of the foreign application as required by 35 U.S.C. 119(b).

# III. <u>ELECTION/RESTRICTIONS</u>

### Response to Election

Examiner has acknowledged Applicant's election without traverse of Group I, claims 1-8 with traverse and provisional species election of the compound of Claim 13, in the Response to the Restriction Letter filed on August 18, 2005. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim that is remaining in the

Application/Control Number: 10/615,481

Art Unit: 1626

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### Status of the Claims

Claims 8, 12-14 are currently pending in the instant application. Claim 9 is withdrawn as said claims are drawn to non-elected subject matter. 37 C.F.R. § 1.142(b). The status of the claims is commensurate with the Amendment to the claims. Thus, the scope of the invention of the elected subject matter is as follows: Claim 8, in part, drawn to the compound of formula (i) wherein: R2 is phenyl or naphthyl as recited in Claim 12 (Amendment, pp. 2-9); and R5 is as described in Claim 12 (Amendment, pp. 2-9).

The withdrawn and or cancelled compounds as a result of the restriction various formulas representing divergent and distinct compounds. This recognized chemical diversity of the various formulas can be seen by the various classifications in the US classification system. For example, subgenus formula (i) is classified in 548/194, while subgenus formula (ii) is classified in 544/369 where R10 is piperazine, for example. Thus, the subject matter withdrawn from consideration as being non-elected subject matter differ materially in structure and composition and the fields of search are not coextensive and therefore have been restricted properly.

## IV. REJECTIONS

#### CLAIM REJECTIONS - 35 USC § 112, SECOND PARAGRAPH

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1626

Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. First, Claim 12 is ambiguous because it recites the compound of

contain nitrogen atoms without sufficient bonds or charges, is necessary. It appears that the nitrogen atom in Formula (i) could be NH2 or perhaps a nitrile; and that the nitrogen atom in the R<sub>5</sub> groups are NH or NR or C=N-.

## V. OBJECTIONS

## **Dependent Claim Objections**

Dependent Claims 8, 13 and 14 are objected to as being dependent upon a rejected based claim. To overcome this objection, Applicant should rewrite said claims in an independent form and include the limitations of the base claim and any intervening claim.

#### Claim Objections

Claim 9 is objected to because of the following informalities: A dependent claim must depend from a *preceding* claim. Appropriate correction is required.

#### Objection to the Specification

The disclosure is objected to because of the following informalities: The disclosure teaches compounds drawn to various formulas and various "R" groups that depict nitrogen atom with one or two bonds. It is unclear whether the nitrogen atom is

Application/Control Number: 10/615,481

Art Unit: 1626

substituted with an "R" group, or is a nitrile or an NH group. Appropriate correction is required.

Also, the specification must include the continuity information after the title. This information is not provided in the Instant Application. Appropriate correction is required.

#### VI. CONCLUSION

## **CONCLUSION**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nyeemah Grazier whose telephone number is (571) 272-8781. The examiner can normally be reached on Monday through Friday from 8:30 a.m. - 5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph K. McKane, can be reached on (571) 272 - 0699. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
